Steele Equine Advanced Veterinary Camp

Our 3-day Advanced Veterinary Camp is designed specifically for those who have completed the Introduction Veterinary Camp and displayed an interest and desire in either becoming a veterinarian or working in the equine industry. There is no application for the Advanced Camp because these campers are selected by the Steele Equine Camp Committee and will be invited to attend.

In the Advanced Camp, campers will further develop their anatomy knowledge, perform dissections, improve upon their suturing skills, practice the fundamentals of surgery as well as medically assess an equine patient. Campers will also attend lectures on equine confirmation, vet school interviews and the business basics of an equine practice.

The Advanced Camp is held during spring break which happens to also be at the height of our repro season. During this time, we board many pregnant mares approaching their due dates and it is our hope that our campers will get the opportunity to experience the birth of a foal.

Through this camp, Dr. Steele and her team aim to further inspire the campers' passion for equine through a deeper, more challenging insight into equine veterinary medicine.

The Camp Committee will meet after the completion of the 2024 Introduction Camp to establish the dates and make the selection for the 2025 Advanced Camp. At that time, we will reach out to those selected. We look forward to sharing in this experience.
